Sample Information

Samples taken per: _____ Apiary _____ Colony _____ Both

Per Apiary: 8 containers with 80-100 bees (1 container per colony) = 1 composite sample for each apiary you sample. Sample will be composite by the NBDC. *Recommended:* 1 composite sample for up to 1,000 colonies.

Per Colony: 1 container with 200 bees for each colony you sample. For a full spectrum analysis (mites, AFB/EFB, Nosema, and viruses), a total of 350 bees will be necessary.
