

CHANGES TO CFIA HONEY HOUSE REGULATIONS

Safe Honey Production Practices (SHPP) 2019 Training Workshop for Registered CFIA Honey Producers

About the SHPP 2019 Workshop

This workshop aims to provide a practical, hands-on approach to understanding the SHPP 2019 and how to apply these practices to your operation.

The purpose of the Safe Honey Production Practices 2019 (SHPP 2019) program is to improve the quality of Canadian honey in the worldwide market by providing honey producers and graders with a set of policies, standard operating procedures and safe honey production records that focus on biosecurity, quality, and traceability in compliance with the Canadian Food Inspection Agency's (CFIA) Safe Food for Canadians Regulations/Act (SFCR/A).

BeeMaid, MBA, ABC, and SBDC have pooled resources to acquire the SHPP 2019 program templates to support the transition from the old CFIA food safety requirements for honey, to the new CFIA requirements in the Safe Food for Canadians Regulations. The SHPP 2019 has been reviewed and approved by CFIA and contains all the 7 elements of the SFCR.
