Syrup Testing Services

The KRTP is offering syrup testing services: @ \$15.00/sample

We require 100 grams of syrup per sample, thus it is ideal to send 120grams per sample

Syrups will be analyzed for percentage of sugar concentration (BRIX), pH, and titratable acidity using sodium hydroxide (NaOH) to neutralize the sample to pH 5.0, 6.0, 7.0, and 8.0.

Prior to submitting samples, please notify the KRTP by email or phone that you are wishing to submit samples. Complete the sample submission form on the following page and include the completed form and a cheque made out to the **Manitoba Beekeepers' Association** along with your samples.

Samples may either be mailed or dropped off to the address above. Please pack and seal samples appropriately to avoid spillage and breakage during transport.

Matthew Polinsky, Program Lead
krtymb@gmail.com
(204) 698-7399

Note: More complex analysis of syrups e.g., Hydroxymethylfurfural (HMF) is beyond the capacity of the KRTP but may be sought through other labs, e.g., Sweetwater Science Labs
